

K-Love is a breath of fresh air in the world of radio. I enjoy all kinds of music but K-Love serves as a positive reminder about what is good in our world. Young children that are very impressionable can listen to music and stories that will build up their faith, not run it down as can happen with other genres of music.

K-Love serves each community with personal help and outreach for those who need it. K-love has actually saved lives as those who were ready to commit suicide have called in as a desperate cry for help and were given a reason to live. If they had not been listening, who knows what would have transpired. People's lives are changed for the better everyday as a result of K-Love. What other radio station or program can say the same? If K-Love were to be taken out of our community there would be a great hole. I wish when I was young (I am 47 now) I had been able to have been influenced by Christian music on the FM airways. Please don't take it away from our children who are really out there listening !
